Surfboardbuilders.com, a new website that lets you customize a surfboard online, now gives you access to even more shapers. Since the site was launched just a couple months ago, surfers worldwide have taken advantage of the site's exceptional service, convenience and access to top shapers.

New Shaping Talent

The shapers on surfboardbuilders.com are expert craftsmen who have dedicated their lives to designing and building the very best wave riding equipment. Until now, this scope of talent has never been assembled in one shop, or been accessible to every level of surfer worldwide. Some of the newest shapers to join surfboardbuilders.com include Jeff "Doc" Lausch of Surf Prescriptions, Bill Shrosbree, Bob Mitsven, David Barr, Bill Minard, Tim Griffin and Steve Barto.

Custom Built for You

On surfboardbuilders.com you can choose your board style and pick your shaper. Board specs are completely customizable--from thickness, length and tail type, to fin set-up, glassing options and color. The surfboardbuilders.com site is the only place where you can use a patent pending process to customize a board online, and get the level of quality that will bring out the best in your surfing ability.

Surfboardbuilders.com is a convenient one-stop shop for surfers looking for the quality that comes from working with a true craftsman.
